My Personal Profile

I am currently an extremely motivated 17-year-old that actively plans to peruse medicine in clinical pathology crisis, control, containment and preventive measures. I have a strong disciplined work ethic as I've worked in a multitude of volunteering positions in community theatre as well as starting my own company the summer as a door-to-door salesman/handyman and working in M n H as a factory worker. I am more than prepared to commit to a solid well-paying job for the next 8 months. I am more than comfortable working independently, following instructions and contributing positively to a team environment. I've worked with government officials in the middle east to be given the license to put on stage Waiting for Godot 1952 by Samuel Beckett in the national Museum of Qatar with having the pleasure of Miss Sheikha Mayassa Bin Hamad Khalifa Al Thani visiting and commemorating my work verbally.
